

DECLARATION

As the OPzV batteries are supplied charged,
storage time is limited.

In order to easily charge the batteries after prolonged storage
it is advised not to store them more than
6 months at 20°C, 4 months at 30°C or 2 months at 40°C.

A refreshing charge shall be performed after this period.

Failure to observe these conditions
may result in significantly reduced capacity and service life.

Alternatively cells can be float charged
at the recommended float voltage during storage.
